Features & Amenities

- Clock(s) displayed on the outside

Facts

- Completed in September 2000, the DoCoMo Yoyogi Building in Tokyo reaches a height of 240 meters and houses base station equipment and switching equipment.
- Power consumption is conserved through the use of CGS and solar power.
- Firefighting equipment also incorporates environment-friendly features. None of the fire extinguishers installed in the building contain halogenated chemicals that would contribute to ozone layer destruction; instead, the building employs a nitrogen gas-based firefighting system.
- Considerations were also made with regard to the surrounding urban landscape by constructing the tower portion of the building to enhance the city skyline.
- A clock, 15 metres in diameter, was put into operation in November of 2002 to celebrate NTT DoCoMo's 10th anniversary making it the tallest clock tower in the world, surpassing Palace of Culture and Science.
- The upper portion of the building features coloured lights that indicate whether one should carry an umbrella.

- A garbage separation system employed within the offices helps to reduce waste and boost the waste recycling rate. Waste water is recycled for reuse and rainwater is used for toilet flushing.

Get Emporis Research today and benefit from our worldwide database now!

Analyze buildings, construction markets, regions and competitors

- 450,000 buildings from a wide range of categories such as residential, office, retail, hospitality and many more
- Choose from a broad range of regional data packages – or create your own
- Powerful and fast search for in-depth analysis
- Detailed search queries in over 50 data fields, e.g. filter by location, size, status, building usage and construction types
- Generate customized lists of construction projects and involved companies

Generate leads and explore new business opportunities

- Get contact information for over 160,000 companies
- Search for companies related to specific construction projects or generate lists according to particular fields of activity
- Find new clients and business partners or connect with key players in new markets
- Forecast trends and future market growth
- Spend less time researching, and more time doing business

Keep up to date and ahead of your competitors

- Get constantly-reviewed data from around the globe
- 24/7 access to the database from anywhere in the world
- View detailed information about existing buildings as well as those planned and under construction
- Save your searches for easy future reference
- Receive email notifications about new content fitting your criteria

Download data and put it to work

- Export information easily to CSV/Excel files
- Individually select data fields for your specific needs
- Integrate the data into your own internal system
- Provide your staff with actionable data
- Benefit from limitless downloads within your chosen package
