Empire State Building

Identification

EBN | 114095
Name | Empire State Building
Construction Type | skyscraper
Current Status | existing [completed]

Location

Continent Name | North America | Block Number | Contact us
Country Name | U.S.A. | Lot Number | Contact us
State Name | New York | Postcode | 10118
Metro Area Name | New York-Newark-Bridgeport Metro Area | Address (as text) | 350 5th Avenue
City Name | New York City | Main Address | 338-350 5th Avenue
Empire State Building

District (1st level) Manhattan
Side Address
1-31 West 33rd Street
2-20 West 34th Street

District (2nd level) Midtown South

Map

Description

Structural System rigid frame
Facade Color light brown

Structural Material steel
Architectural style Art Deco

Facade System curtain wall
Main Usage commercial office

Facade Material limestone
Side Usage shop(s)
service branch(es)
restaurant

Spatial dimensions

Height (structural) 1,250.02 ft
Volume

**Features & Amenities**

- One of the city's famous buildings
- City landmark
- National landmark
- Observation deck on roof
- Observation floor is available

**Facts**

- Tallest building in the world from 1931-1972; surpassed by One World Trade Center.
- Regained city's tallest title after September 11, 2001 until the new One World Trade Center was topped out in 2012.
- Built in 1930 to be the tallest structure on earth, the Empire State Building was then considered the largest commercial venture and investment ever.
- The Empire State Building was constructed on the site of the former Astoria Hotel.
- Excavation began on January 22, 1930 with actual construction on March 17, 1930. Construction took just over 18 months.
- Cornerstone was laid on September 17, 1930 by former New York governor Alfred E. Smith.
- The tower was one of the first to employ the then new fast-track construction technique. Framework rose at the rate of 4 1/2 floors per week.

• The masonry was completed on November 13, 1930.
• During construction of the steel frame, eating facilities were set up on appropriate floors to cater for the workers.
• During planning stages the construction death toll was estimated to be one worker per floor, or over 100 workers overall. However, only a handful of workers lost their lives during construction.
• The building was completed about a month and a half ahead of schedule and about $5 million under budget.
• President Herbert Hoover officially opened the building on May 1, 1931 by pressing a button from The White House that turned on the building’s lights.
• Soon after opening it became a major tourist attraction, attracting many famous people, including the French Prime Minister, Albert Einstein, Winston Churchill, Pope Pius XII, Fidel Castro and Queen Elisabeth II, to name a few. The only one known to have refused Alfred E. Smith’s invitation was Walter P. Chrysler.
• The lobby is a five-story Art Deco masterpiece crafted in rich granite and marble, and highlighted by brushed stainless steel.
• Decorated with enormous bronze medallions celebrating the craftsmen responsible for the building, and a metal mosaic featuring the building as the center of the universe, the lobby is without peer.
• The building incorporates 10 million bricks, 1,172 miles (1,886 kilometers) of elevator cables, 6,400 windows, and weighs 331,000 tons.
• Constructed with 60,000 tons of structural steel.
• The façade is composed of more than 200,000 cubic feet of Indiana limestone and granite, and utilizes several setbacks to offset the optical distortion of its 102-story height.
• There are 1,575 steps from the lobby to the 86th floor.
• Houses over 1,000 businesses with its own zip code.
• Initially the building was intended to have a flat roof until a "hat" or metal-plated tower on top of the building was designed. It initially served double duty as a zeppelin mooring mast and an observatory.
• The metal-plated tower on top of the building was planned as a zeppelin port. Yet it was used for only one zeppelin landing because the winds were too strong at such heights making mooring dangerous and also because the golden age of zeppelins was quickly slipping into the past.
• On a Saturday morning in July 1945, a US B-25 Bomber crashed into the 79th floor offices of the Catholic War Relief Services. Fourteen people died. Despite suffering some fire damage and a 20-foot gash, the Empire State building opened back up for business on Monday.
• A broadcasting antenna was added to the building in 1951 putting the almost vacant metallic tower at the top to use as a storage area for broadcasting equipment.

New York 03:00 am - 01:00 pm
Tokyo 04:00 pm - 02:00 am
• An international icon, more than 3.5 million people visit the observatory every year to take in the 80-mile view into New Jersey, Pennsylvania, Connecticut, and Massachusetts.

• As a popular symbol of the city and its spirit, the building is a common focal point in the visual arts, television, and film.

• Declared a landmark by the New York City Landmarks Preservation Commission on May 18, 1981.

• Listed on State and National Register of Historic Places on December 20, 1982.

• Declared a National Historic Landmark on October 23, 1986.

• The Empire State Building is a legend. Built in the midst of the Depression, it was, and still remains a testament to American fortitude and ingenuity.

• The Empire State Building is a member of the World Federation of Great Towers.

Get Emporis Research today and benefit from our worldwide database now!

Analyze buildings, construction markets, regions and competitors

- 450,000 buildings from a wide range of categories such as residential, office, retail, hospitality and many more
- Choose from a broad range of regional data packages – or create your own
- Powerful and fast search for in-depth analysis
- Detailed search queries in over 50 data fields, e.g. filter by location, size, status, building usage and construction types
- Generate customized lists of construction projects and involved companies

Generate leads and explore new business opportunities

- Get contact information for over 160,000 companies
- Search for companies related to specific construction projects or generate lists according to particular fields of activity
- Find new clients and business partners or connect with key players in new markets
- Forecast trends and future market growth
- Spend less time researching, and more time doing business

Keep up to date and ahead of your competitors

- Get constantly-reviewed data from around the globe
- 24/7 access to the database from anywhere in the world
- View detailed information about existing buildings as well as those planned and under construction
- Save your searches for easy future reference
- Receive email notifications about new content fitting your criteria

Download data and put it to work

- Export information easily to CSV/Excel files
- Individually select data fields for your specific needs
- Integrate the data into your own internal system
- Provide your staff with actionable data
- Benefit from limitless downloads within your chosen package
