## Spatial dimensions

<b>Height (structural)</b>	242 ft	<b>Floors (overground)</b>	24
<b>Height (floor-floor)</b>	9.5 ft	<b>Units</b>	<a href="#">Contact us</a>
<b>Length</b>	330 ft	<b>Gross Floor Area (GFA)</b>	<a href="#">Contact us</a>
<b>Floors (underground)</b>	4		

## Years and costs

<b>Year (construction start)</b>	1979	<b>Year (construction end)</b>	1981
----------------------------------	------	--------------------------------	------

## Facts

- Destroyed during terrorist attacks on September 11, 2001.
- The hotel was originally designed with 450 rooms in the late 1960s. A foundation and three levels were constructed before the owner's program was substantially increased to 825 rooms because of the dynamic growth of Lower Manhattan at that time.
- This building was situated between (and connected to) the twin towers of the World Trade Center, the Marriott was adjacent to the World Financial Center and within walking distance of the Lower Manhattan financial district and Wall Street.
- A 24-story (22 stories from World Trade Center plaza), steel-frame building with an exterior of horizontal bands of anodized aluminum panels and glass, the hotel contained public spaces on the lower levels under the guest room tower.
- The service level included administrative offices, training facilities and parking. Directly above it the lobby level, which was accessible from the street and from the World Trade Center concourse, included check-in facilities, shops and the ballroom.

- The Plaza level contained the balance of the hotel's important public spaces: a business center with secretarial and communication services, two restaurants and a lounge.
- Because the hotel was located in the financial district, it incorporated special facilities that served the international investment community. While floors 4-19 contained guest rooms, the third floor featured conference facilities that included 12 conference rooms and a lounge, and floors 20-21 housed the VIP club.

# Get Emporis Research today and benefit from our worldwide database now!

## Analyze buildings, construction markets, regions and competitors

- 450,000 buildings from a wide range of categories such as residential, office, retail, hospitality and many more
- Choose from a broad range of regional data packages – or create your own
- Powerful and fast search for in-depth analysis
- Detailed search queries in over 50 data fields, e.g. filter by location, size, status, building usage and construction types
- Generate customized lists of construction projects and involved companies

## Generate leads and explore new business opportunities

- Get contact information for over 160,000 companies
- Search for companies related to specific construction projects or generate lists according to particular fields of activity
- Find new clients and business partners or connect with key players in new markets
- Forecast trends and future market growth
- Spend less time researching, and more time doing business

## Keep up to date and ahead of your competitors

- Get constantly-reviewed data from around the globe
- 24/7 access to the database from anywhere in the world
- View detailed information about existing buildings as well as those planned and under construction
- Save your searches for easy future reference
- Receive email notifications about new content fitting your criteria

## Download data and put it to work

- Export information easily to CSV/Excel files
- Individually select data fields for your specific needs
- Integrate the data into your own internal system
- Provide your staff with actionable data
- Benefit from limitless downloads within your chosen package
